

```
class Area_Circal {  
  
    public static void main(String[] args) {  
  
        double Radius = 7;  
  
        double pi = 3.142;  
  
        double AreaCircal = pi*Radius*Radius;  
  
        System.out.println(AreaCircal);  
  
    }  
}
```

Output:

153.958
