

```
class Areas {  
  
    public static void main(String[] args) {  
  
        int length = 14;  
  
        int width = 11;  
  
        int AreaRectangle = length*width;  
  
        System.out.println("Area of rectangle " + AreaRectangle);  
  
  
        int side = 15;  
  
        int AreaSquare = side*side;  
  
        System.out.println("Area of Square " + AreaSquare);  
  
  
        int base = 14;  
  
        int height = 12;  
  
        double AreaTriangle = 0.5*base*height;  
  
        System.out.println("Area of Triangle " + AreaTriangle);  
  
    }  
}
```

Output:

Area of rectangle 154

Area of Square 225

Area of Triangle 84.0
