

```
class Cube {  
  
    public static void main(String[] args) {  
  
        int a = 35;  
  
        int cube = a*a*a;  
  
  
        System.out.println(cube);  
  
  
    }  
}
```

Output:
