

```
class Simple_Interest {  
  
    public static void main(String[] args) {  
  
        int principalAmount = 12592;  
  
        double InterestRate = 0.06;  
  
        int Time = 12;  
  
        System.out.println("Simple Interest " + principalAmount*InterestRate*Time);  
  
    }  
}
```

Output:

Simple Interest 9066.24
